EDUCATION

Thompson Rivers University
Bachelor of Computing Science

Sept 2021 - Dec 2025
Kamloops, B.C

PROJECTS

Automated LiDAR Point Cloud Analysis Pipeline — *Python, NumPy, Pandas, Open3D, SciPy, Plotly*

- Built an **automated Python pipeline** to compute CSS/OSS metrics from **LiDAR point cloud data**.
- Implemented **point cloud normalization, surface smoothing, feature detection, and radial distance computation**, with support for batch execution and visualization.
- Applied **modular design, parameter tuning, data validation**, and reproducible analysis, strengthening skills in **data pipelines** and **3D spatial reasoning**.

IoT-Based Health Monitoring and Risk Classification System — *Python, IoT, Embedded Systems, Machine Learning*

- Built an **end-to-end IoT health monitoring pipeline** integrating embedded sensors, wireless data ingestion, cloud storage, and a Python-based processing layer to enable **continuous vital-sign tracking**.
- Implemented data analysis and machine-learning classification workflows to assess health risk levels, with real-time visualization and alerting to support timely intervention.

Procedural Board Generation System — *JavaScript, Algorithms, Procedural Generation, Seeded Randomness*

- Designed and implemented procedural generation algorithms to construct a valid closed-loop grid path with controlled detours, guaranteeing cycle correctness and spatial constraints on every run.
- Developed **deterministic tile-assignment and seeded randomness logic** to enforce rule-based placement, balanced distribution, and reproducible outputs, while supporting interactive rendering and state inspection.

SKILLS

Languages: Python, Java, Javascript, C++, SQL, HTML, CSS
Frameworks: Node.js, React, Flask
Libraries: Flask, NumPy, Pandas, SciPy, Open3D, Plotly, Scikit-learn
Tools: LLMs, Jira, Git, CloudCompare, Firebase, Figma

EXPERIENCE

Board Member - TRUSU Cybersecurity Club
Thompson Rivers University

Oct 2024 - Dec 2025
Kamloops, B.C

- Planned and executed **5+** technical **events and workshops**, overseeing end-to-end logistics, documentation, and pre-event readiness, while ensuring alignment with cybersecurity best practices and student learning objectives.
- Spearheaded **industry engagement**, inviting and coordinating with **20+** cybersecurity professionals and leaders, facilitating knowledge-sharing, networking, and mentorship opportunities for students.
- Led **marketing, outreach, and community-building initiatives**, increasing event attendance by **150%**, strengthening club presence, and fostering a collaborative cybersecurity learning environment.

Guest Services Agent
Prestige Hotels & Resorts

Oct 2022 - Present
Kamloops, B.C

- Assisted and **resolved guest needs** end-to-end, ensuring high-quality service delivery and enhancing overall customer satisfaction.
- **Coordinated, trained, and audited front-desk staff**, streamlining onboarding processes and maintaining consistent operational standards.
- Developed and deployed small software fixes to optimize local operations, improving workflow efficiency and throughput by **25%**, while reducing manual effort.

Tutor
GoStudent

Oct 2021 - Apr 2022
Remote

- Mentored 3 students through daily tutoring sessions, improving their final scores by 45% compared to previous Grade 11 performance through personalized instruction and progress tracking.

PUBLICATIONS & AWARDS

- **“Smart Armrest Prototype for Non-Obtrusive IoT Health Monitoring and AI-Assisted Triage in Older Adults”**, ISG 2026 Journal — Accepted for publication; scheduled for presentation in March 2026.
- **Dean’s List** — Recognized for academic excellence for 5 semesters: *Fall ’21, Fall ’23, Winter ’24, Fall ’24, Fall ’25*
- Awarded **3rd Place School-Wide in Grade 12**, achieving a final score of **93.6%**
