

Behlah Katleriwala

FULL STACK DEVELOPER

Kamloops, BC | (778) 586-7776 | bkatleriwala@gmail.com
behlah.netlify.app | github.com/Behlah-0612 | linkedin.com/in/behlah-katleriwala

Recent Computing Science graduate with hands-on full stack experience across web applications, data pipelines and IoT prototypes. Works in React, Next.js, TypeScript and Python, with Supabase and Firebase on the backend.

Runner-up, Kamloops 2026 Hackathon • First-author publication, Gerontechnology • Capstone with Highland Valley Copper (Teck)

EDUCATION

Thompson Rivers University | BSc Computing Science Sept 2021 to Dec 2025
Kamloops, BC | Dean's List: Fall 2021, Winter 2024, Fall 2024, Fall 2025

PROJECTS

Door-to-Door Window CRM | Next.js, React, TypeScript June 2026 to Present
Independent contractor for a window cleaning sales startup, Kamloops, BC

- Building a CRM that covers the full door-knock-to-sale cycle: canvassing, job scheduling and sales rep payment collection.
- Designed role-based views for admins (area overview), sales reps and technicians. In testing before the team rolls it out.

LiftSafe | JavaScript, MediaPipe | [Live demo](#) Sept 2026
Runner-up, Kamloops 2026 Hackathon hosted by Arc Technologies (team of three)

- Camera-based lifting coach: instant feedback and a safety score for the worker, a dated training record for the employer.
- Runs entirely in the browser with pose estimation, so no video is stored or uploaded.

LiDAR Crusher Gap Measurement | Python, NumPy, Pandas, Open3D, Plotly | [GitHub](#) Capstone
Highland Valley Copper (Teck Resources)

- Built a pipeline that turns Livox Avia LiDAR scans of a gyratory crusher into closed and open side setting measurements.
- Tested segmentation and distance methods, then found return angle and gradient isolated the mantle and wall most reliably.

Smart Health Monitoring Chair | Arduino, Python, Firebase | [Publication](#) | [GitHub](#) 2026
First author, Gerontechnology, 25(s)

- Built a smart armrest that reads heart rate, temperature and ECG passively, using Arduino MKR WiFi 1010 and Uno boards.
- Wrote a Python serial bridge that streams readings to Firebase for a live cloud dashboard.

PantryChef | Next.js, TypeScript, Supabase, OpenAI API | [GitHub](#) 2026
OpenAI Build Week hackathon

- Mobile-first app that turns receipt photos into a pantry and recipe suggestions with cost and nutrition. Supabase row-level security isolates each user's data.

EXPERIENCE

Software and UI Developer (Volunteer) | Two early-stage AI startups, remote Nov 2025 to May 2026

- Designed wireframes and layouts and coded in React and Node, with backend work in Supabase, MongoDB and SQL.
- Built an end-to-end grading system for teachers, with an AI layer that auto-grades for teacher review and release.
- Wrote user flows and SRS documentation and moved wireframes from FigJam into Figma Make.

Guest Services Trainer | Prestige Hotels & Resorts, Kamloops, BC Oct 2022 to Present

- Train and audit front-desk staff, and handle cash handling, reconciliation and guest operations, plus small IT tasks around the property.

Board Member, Social Media, Events and Marketing Head | TRUSU Cybersecurity Club Sept 2024 to Dec 2025

- Organized workshops and events, brought in industry professionals, and ran the club's marketing and social media.

SKILLS AND CERTIFICATIONS

Languages: Python, JavaScript, TypeScript, Java, C, SQL
Web: React, Next.js, Node.js, HTML, CSS, Tailwind CSS, Flask, Figma
Data and Cloud: Supabase, Firebase, MongoDB, Netlify
AI and Tools: OpenAI API, LLM and RAG integration, Make, Git, Arduino
Certificates: Microsoft 365 Copilot Essentials, Microsoft Azure Essentials (Microsoft and LinkedIn Learning, Aug 2026)
